SIDERURGICA DEL POLESINE IS AN ITALIAN LEADER IN THE WATER TREATMENT EQUIPMENT MANUFACTURING.

The modern structure of our organization allows a dynamic management of our operations. The company has a highly structured production site, an outstanding technological level and a dynamic staff. It is equipped with the most advanced tools to process complex orders. We control all the order phases internally: from the initial consulting phase with the customer, to finalize the best solution for his needs, through designing, manufacturing, internal quality checks, to installation at the customer's site, training of his staff and after sales services such as maintenance and assistance.
